SUMMARY

Currently pursuing a Bachelor of Technology in Computer Science Engineering (Cyber Security) at Bennett University and recently completed the second year of study. Experienced in AI-powered applications, frontend development, Linux systems, and networking fundamentals. Skilled in Python, React, JavaScript, and full-stack development with hands-on experience in hackathons, collaborative technical projects, and AI-integrated solutions.

EDUCATION

Bennett University, Greater Noida, UP
Bachelor of Technology in Computer Science Engineering (Cyber Security)
Currently Pursuing | Completed Second Year
2024 – 2028 | CGPA: 8.02

Birla Public School, Pilani, Rajasthan
Senior Secondary School Certificate (Science)
2024 | Marks: 81.6%

St. Marks Sr. Sec. Public School, New Delhi
Secondary School Certificate
2022 | Marks: 91%

INTERNSHIP

JK Tech — IT Intern
June 2026 – July 2026

- Prepared and deployed 60+ Windows laptops for users by joining systems to the domain, configuring required settings, and ensuring devices were ready for assignment.
- Provided hands-on IT support and troubleshooting, including hardware upgrades such as RAM installation and laptop battery replacement.
- Assisted with networking and system administration, including user support, connectivity troubleshooting, and deployment of system updates.
- Worked with Microsoft 365 Admin Center, Microsoft Azure, and Microsoft Defender to support user, device, security, and administrative operations.
- Used Active Directory and IT ticketing/helpdesk systems to manage user accounts, devices, and technical support requests.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, JavaScript, Bash
Frontend: HTML, CSS, React, Responsive UI Development
Tools & Platforms: Git, GitHub, Linux, Windows, VS Code
Cloud & Administration: Microsoft Azure, Microsoft 365 Admin Center, Active Directory, Microsoft Defender
Cybersecurity & Systems: Networking, Linux Administration, Endpoint Security, Operating Systems
Concepts: DSA, OOP, REST APIs, Problem Solving

PROJECTS

SkillForge AI - AI-Powered Personalized Learning Platform
Tech Stack: React, Python, AI/ML, REST APIs, Database

- Developed an AI-enabled personalized learning platform that identifies competency gaps and generates role-specific learning recommendations.

- Built responsive learner and administrator dashboards with personalized skill profiles, competency tracking, and adaptive learning workflows.
- Integrated AI-powered assessments to generate source-grounded MCQs and quizzes from learning materials, with automated evaluation and feedback.
- Implemented a closed learning loop — Profile → Assess → Recommend → Learn → Reassess — to continuously update competency scores and personalize recommendations.

NeuralFort - Mental Health AI Assistant
Tech Stack: Python, React, APIs, AI Integration

- Developed an AI-powered conversational assistant focused on mental health support and contextual interaction.
- Built responsive frontend interfaces and integrated backend APIs for real-time communication workflows.
- Implemented prompt-engineering techniques to improve conversational quality and user engagement.
- Designed scalable architecture for future expansion including sentiment analysis and personalized recommendations.

AgriSustain – AI Farming Assistant
Tech Stack: React, Python, AI/ML, Dataset Integration

- Built an AI-powered agriculture assistance platform providing crop recommendations, soil insights, and sustainable farming guidance.
- Collaborated in a team environment during Hackaccino 2025 to develop frontend workflows and integrate agricultural datasets.
- Developed interactive UI components and contributed to recommendation-system integration.
- Presented a working prototype under hackathon time constraints while improving rapid problem-solving and collaboration skills.

USB Firewall for Linux
Tech Stack: Bash, Linux, udev, sysfs, Kali Linux

- Built a Linux-based USB Firewall capable of automatically detecting and blocking unauthorized USB devices in real time.
- Implemented whitelist-based authorization using udev rules and sysfs for enhanced endpoint security.
- Developed automated monitoring and blocking workflows through shell scripting and Linux system utilities.
- Added secure logging mechanisms for audit tracking and basic digital forensics analysis.
- Strengthened practical understanding of Linux security, device management, and system-level scripting.

Responsive Website Templates
Tech Stack: HTML, CSS, JavaScript

- Designed and developed responsive multi-page website templates optimized for modern UI/UX standards.
- Implemented reusable frontend components and mobile-first layouts for improved scalability and maintainability.
- Currently converting projects into customizable templates for portfolio and broader deployment use.
- Focused on clean design systems, responsiveness, and user-friendly navigation.

HACKATHONS & LEADERSHIP

Smart India Hackathon – Internal Hackathon, Bennett University (2026)

- Collaborated as part of a 6-member team to develop SkillForge AI, an AI-enabled personalized learning platform for competency-gap analysis and adaptive learning.
- Contributed to the platform's frontend, database connectivity, AI-integrated workflows, and API-driven features; the project advanced to the Top 100 teams in the Bennett University internal SIH 2026 selection process.

Hackathon Participant – Hackaccino, Bennett University (2025)

- Collaborated in a team environment to build Agrisustain, an AI-powered agriculture platform.
- Gained practical exposure to rapid prototyping, AI integration, frontend development, and technical presentation.

Smart India Hackathon – Preliminary Round, Bennett University (2024)

- Contributed to the development of a smart trip planner web application generating optimized itineraries based on user preferences and budgets.
- Strengthened teamwork, UI/UX design, deployment understanding, and project management skills.

Delegate – Model G20 Summit, Birla Public School (2023)

- Represented the European Union in simulated G20 negotiations focused on global economic recovery, climate policy, and international trade cooperation.
- Conducted policy research, drafted position papers, and collaborated with delegates to build consensus on sustainable global solutions.
- Strengthened analytical thinking, public speaking, diplomacy, and policy research skills.

Vice Chair – Birla Public School Model UN (2023)

- Moderated committee discussions, reviewed resolutions, and coordinated structured debates among delegates.
- Enhanced leadership, communication, negotiation, and conflict-resolution skills.

CERTIFICATIONS

2026

- Data Structures in C++ — Scaler
- Design Thinking: Ideas to Action — University of Virginia (Coursera)
- Introduction to Cybersecurity Essentials — IBM (Coursera)
- Introduction to Microprocessors — Arm Education (Coursera)
- Operating Systems and You: Becoming a Power User — Google (Coursera)
- The Bits and Bytes of Computer Networking — Google (Coursera)

2025

- Core Java Programming Revisited — Infosys Springboard
- Data Structures and Algorithms — Infosys Springboard
- Deloitte Technology Job Simulation — Forage
- Digital Electronics — Infosys Springboard
- Electronic Circuits and Number System — Infosys Springboard
- Introduction to Linear Algebra with MATLAB — MathWorks
- Introduction to Linux — The Linux Foundation
- Introduction to Modern Database Systems — Saylor Academy
- Introduction to Statistics — Saylor Academy
- MATLAB Programming Techniques — MathWorks

2024

- Entrepreneurship Strategy: From Ideation to Exit — HEC Paris (Coursera)
- Introduction to Python — Infosys Springboard
- Introduction to Symbolic Math with MATLAB — MathWorks
- MATLAB Fundamentals — MathWorks
- Python Fundamentals — Infosys Springboard
